**EXPLANATION OF SYMBOLS**

The following symbols shall be used in this tariff for the purpose indicated below:

- (I) - To signify increase in rates.
- (D) - To signify decrease in rates.
- (C) - To signify any other changes.

**TARIFF FORMAT**

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between Page 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4<sup>th</sup> revised Page 14 cancels the 3<sup>rd</sup> revised Page 14.
- C. Paragraph Numbering Sequence - There are various levels of paragraph coding. Each level of coding is subservient to its next higher level:
  - 2
  - 2.1
  - 2.1.1
  - 2.1.1.A
- D. Check Sheets - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. An asterisk designates all revisions made in a given filing (\*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

**SECTION 2 - REGULATIONS, (CONT'D.)**

**2.1 Undertaking of the Company, (Cont'd.)**

**2.1.4 Liability of the Company**

The liability of the Company, or any other common carrier or other service provider that furnishes any portion of the Company's services, for damages arising from errors, mistakes, omissions, interruptions, or delays of the Company, or its agents, servants, or employees, in the course of establishing, furnishing, rearranging, moving, terminating, or changing regulated or nonregulated service or facilities (including the obtaining or furnishing of information in respect thereof or with respect to the Customers of the service or facilities) will not exceed an amount equal to the MRC (calculated on a proportionate basis) for the affected service during the period which such error, mistake, omission, interruption or delay occurs, or \$500.00, whichever is greater. The Company is not liable under any circumstances for any act, omission, error, mistake, interruption or delay of any connecting carrier or other service provider or their respective agents, servants or employees; nor will the Company have any such liability for providers of connections, equipment, facilities, or services other than the Company or its agents, servants, or employees. The Company will not be liable under any circumstances for any act, omission, error, mistake, interruption or delay of any person or entity owning telecommunications facilities used by the Customer or who furnishes facilities or services connected with or provided in conjunction with the Company's service; or for the culpable conduct of the Customer, its agents, servants, employees, invitees, or guests, or failures of equipment, facilities or connections provided by the Customer. Such activities may include, but are not limited to, equipment or facilities additions, removals or rearrangements and routine preventative maintenance. Generally, such activities are not specific to an individual Customer but affect many Customers' services. No specific advance notification period is applicable to all service activities. **SECTION 2 - REGULATIONS, (CONT'D.)**

**2.1 Undertaking of the Company, (Cont'd.)**

**2.1.7 Universal Emergency Telephone Number Service (911, E911)**

**A. General**

The Service Access Code 9-1-1 allows the customer to reach the appropriate emergency services including police, fire and medical services. Enhanced 9-1-1 has the ability to selectively route an emergency call to the primary 9-1-1 provider so that it reaches the correct emergency service located closest to the caller. In addition, the Customer's address and telephone information will be displayed to the primary 9-1-1 provider for display at the Public Safety Answering Point (PSAP).

Pursuant to the Pennsylvania Act 12 of 2015 the Telephone Company collects a fee from its customers on behalf of the counties in its operating area to support the 9-1-1 system. Counties of the first through second class may impose a monthly contribution rate in an amount not to exceed \$1 per line on each local exchange access line. Counties of the third through fifth class may impose a monthly contribution rate in an amount not to exceed \$1.25 per line on each local exchange access line. Counties of the sixth through the eighth class may impose a monthly contribution rate not to exceed \$1.65 per line on each local exchange access line. The contribution rate may be used by counties for the expenses of implementing, expanding or upgrading a 9-1-1 system.

Parties dialing 9-1-1 waive the privacy afforded by non-listed and non-published service to the extent that the telephone number, names, and address associated with the originating station location are furnished to the Public Safety Answering Point.

**SECTION 2 - REGULATIONS, (CONT'D.)**

**2.11 Telecommunications Relay Service**

**2.11.1 General**

The Pennsylvania Telecommunications Relay Service (PA TRS) is a relay telecommunication service for the deaf, hard of hearing, hearing and/or speech disabled population of the Commonwealth. The PA TRS is mandated by the Americans with Disabilities Act of 1990 to provide functionally equivalent telephone services that are available to other U.S. citizens, at no additional cost. The PA TRS includes both traditional relay (devices such as Teletypewriters (TTY) and Telecommunication Devices for the Deaf (TDD)) and captioned-telephone voice-carry-over relay services (captioned telephone). These relay services permit telephone communications between individuals with hearing and/or speech disabilities, who must use a TTY, TDD or captioned telephone, with individuals having normal hearing and speech. Additionally, 711 abbreviated dialing is available to access the PA TRS. The Company's switching equipment is arranged to translate the "711" calls to the assigned toll-free number, (888) 895-1197, in order to route calls to the Telecommunications Relay Service Provider, in accordance with Commission's Order entered on February 4, 2000 at Docket No. M-00900239.

**2.11.2 Surcharge**

In addition to the charges provided in this tariff, a surcharge will apply to all residence and business access lines served by this Company. (Access lines are those lines extending from the telephone company's central office to the end-user's premises.) This surcharge applies regardless of whether or not the access line uses the PA TRS.

The surcharge serves as the funding vehicle for the operation of the PA TRS, Telecommunications Device Distribution Program and the Print Media Access Service Program and shall be calculated by the Pennsylvania Public Utility Commission (the Commission). The Commission shall compute the PA TRS surcharge each year and notify local exchange carriers of the surcharge amount to be applied for the twelve-month period commencing with July 1 of each year.

The Commission may revise the surcharge more frequently than annually at its discretion.

Tariff revisions will be filed whenever the Commission calculates a new surcharge amount and notifies the Company.

**SECTION 5 - LOCAL EXCHANGE SERVICE, (CONT'D.)**

**5.3 Primary Rate Interface (PRI) Service**

**5.3.1 Service Description**

Primary Rate Interface (PRI) Service is an ISDN local exchange service that provides a Customer with the ability to transmit and receive multiple voice and data circuit switched calls simultaneously over a single Primary Rate Facility. PRI Service is available from suitably equipped central offices and where suitable loop facilities exist.

PRI Service consists of a Primary Rate Facility and B-Channel Bearer Trunks and D-Channel Bearer Services. The Primary Rate Facility and the ISDN Bearer Trunks are not offered separately. Up to twenty-three B-Channels Bearer Trunks and one D-Channel Bearer Service may be provisioned on each access line. In addition, optional features may be purchased as specified in 7.1.4 of this section.

PRI Service will provide transport of customer information over the 23 available B channels in the form of circuit-switched voice or data at speeds up to 64 Kbps. The basic service will include the 1.544 Mbps switched facility and the D-Channel Bearer Service. B-Channels will be ordered in addition to the Primary Rate Facility.

Dedicated B-Channel configuration: Dedicated trunk groups are the standard feature for PRI Service. Dedicated trunk groups must be assigned to handle one specific call type (examples: DID, DOD).

Three types of B-Channel Bearer Trunk Channels are available as follows.

Standard channels provide the same features as analog trunk lines found in the Local Exchange Services section of this Nonresidence Service Agreement.

DID channels provide direct inward dialing service. Two Way DID channels provide capability for two-way standard service and direct inward dialing service.

D-Channel configuration: Each Basic PRI service will include a dedicated D-Channel for signaling.

All Bearer Trunk Channels use Medium Frequency (MF) or Dual Tone Multi Frequency (DTMF) signaling.

Only flat rate trunk channels are available.

**SECTION 5 - LOCAL EXCHANGE SERVICE, (CONT'D.)**

**5.3 Primary Rate Interface (PRI) Service, (Cont'd.)**

**5.3.2 Definitions**

**A. Primary Rate Facility**

A Primary Rate Facility is a digital pipe from the Customer's location to the Company central office which transports one or more ISDN Bearer Trunks (B. and C. following). A Primary Rate Facility can carry up to twenty-three 64 Kbps B-Channel Bearer Trunks and one 64 Kbps D-Channel Bearer Service. All selected Bearer Trunks and Services can operate on the Primary Rate Facility simultaneously.

**B. B-Channel Bearer Trunks**

B-Channel Bearer Trunks define the types of traffic that the Primary Rate Facility will carry. A B-Channel Bearer Trunk is a 64 Kbps information channel used in conjunction with circuit-switched service. These trunks can be configured as 1-Way In, 1-Way Out, or 2-Way.

**C. D-Channel Bearer Services**

The D-Channel Bearer Service is a 64 Kbps signaling channel used to control associated B Channels. One D-Channel is required for each Primary Rate Facility and is included in the Primary Rate Facility's monthly rate.

**SECTION 5 - LOCAL EXCHANGE SERVICE, (CONT'D.)**

**5.3 Primary Rate Interface (PRI) Service, (Cont'd.)**

**5.3.3 Regulations**

PRI Service is furnished subject to the availability of suitable facilities and is only served from specially-equipped digital central offices.

Service from some central offices may not provide all of the features and functionality described in this section.

The minimum service period for PRI Service is twelve months.

The Customer must provide customer premises equipment that meets the technical requirements of the serving central office.

The Customer is responsible for providing power to all customer premises equipment (CPE) attached to the Primary Rate Facility.

The Customer must notify the Company when call type maximums and minimums are to be changed for the call-by-call feature. This is in order to maintain the proper provision of directory numbers and call control on the line.

Customers wishing to upgrade existing analog trunk service to PRI Service will be charged the listed initial charges for the appropriate number of Primary Rate Facilities and will have to convert to the PRI Service DID rate structure. Initial charges on B-Channel Bearer Trunk Channels are waived for the existing analog trunks that are moved to PRI Service. Any new channels added at the time of conversion to PRI Service will incur initial charges.

When a customer transfers a call, the customer is responsible for any toll charges associated with the customer originated leg(s) of the call.

One 911 charge, as set by the Public Safety Answering Point, is applied to each outgoing and 2-way B-Channel Bearer Trunk (per channel).

The following features are available to PRI Service customers at additional cost.

**A. Call-By-Call Service Selection**

This feature provides the option for B-Channels to be assigned into a flexible trunk group which can support different call types based on real-time traffic needs. Call-By-Call service selection also allows primary as well as secondary long-distance carriers to be established for the entire trunk group (e.g., Alternate Routing Arrangement).

**B. Individual Calling Line Identification (ICLID)**

This feature provides customer access to the calling party's number. Feature operation is dependent on customer premise equipment and technology in use at the calling party's serving office. (Similar to the Caller ID feature available on access lines.)

**C. Direct Inward Dialing (DID)**

This feature provides Direct Inward Dialing to a station. DID Termination rates will apply per B-Channel configured with this option. ISDN Primary Rate Interface Service DID Number Blocks are ordered with DID Terminations on the B-Channels.

**D. Back-up D-Channel**

This feature provides a minimum of three or more Primary Rate Interface Service facilities terminating at the same customer premises to share one primary and one secondary (or Back-up) D-Channel. The number of Primary Rate Interface Service facilities that can be shared by this feature will be based upon the availability of central office and other network facilities and will be subject to change on a central office by central office basis.

**SECTION 6 - MISCELLANEOUS CHARGES AND SERVICES**

**6.1 Toll Presubscription**

**6.1.1** Toll Presubscription is a procedure whereby the Customer designates to the Company the IntraLATA and InterLATA Toll Providers, i.e., Interexchange Carriers (IXCs) that the Customer wishes to be its carrier(s) of choice for toll calls. Such calls are automatically directed to the designated carrier(s) without the need to use carrier access codes or additional dialing to direct the calls to the designated carrier. Toll presubscription does not prevent a Customer who has presubscribed to a toll carrier from using carrier access codes or additional dialing to direct calls to an alternative toll carrier on a per call basis.

Each carrier will have one or more access codes assigned to it for various types of service. When the Customer selects a carrier as its preferred IXC, only one access code of that carrier may be incorporated into the switching system of the Company permitting access to that carrier by the Customer without dialing an access code. Should the Customer wish to use other services of the same carrier, it will be necessary for the Customer to dial the necessary access code(s) to reach that carrier's other service(s).

An IXC must use Feature Group D (FGD) Switched Access Service to qualify as a presubscription toll provider unless prior arrangements have been made with or by the Company. IXCs must submit an Access Service Request (ASR) to the Company.

Selection of toll presubscription providers by an end user is subject to the terms and conditions following.

**6.1.2** At the option of the IXCs, the nonrecurring charge for a change in toll presubscription, as provided herein, may be billed to the IXCs, instead of the Customer. This may involve charges resulting from Customer initial free choice Preferred Interexchange Carrier (PIC), as specified in 6.1.3.A. following.

**SECTION 6 - MISCELLANEOUS CHARGES AND SERVICES, (CONT'D.)**

**6.1 Toll Presubscription, (Cont'd.)**

**6.1.3 Presubscription Charge Application**

**A. Customer choices for toll presubscription**

1. Designating an intraLATA and interLATA IXC(s) as primary carrier(s) thereby requiring no access code to access those IXCs' service. A Customer is not required to choose the same IXC for intraLATA and interLATA toll presubscription. Other nonpresubscribed IXCs are accessed by dialing 10XXX, 101XXXX, or other required codes.
2. Choosing no carrier as a primary carrier thus requiring 10XXX or 101XXXX code dialing to access all IXCs.

**B.** If a new Customer cannot decide upon presubscription IXCs, the Company may extend a 30-day period following completion of the initial service request to make a choice without charge. In the interim, the Customer will be assigned as a 'No-PIC' and must dial an access code to make toll calls.

**C.** If an IXC elects to discontinue Feature Group, the IXC is obligated to contact, in writing, all Customers who have selected the canceling IXC as their preferred toll provider. The IXC must inform the Customers that it is canceling its Feature Group D Service, request that the end user select a new IXC, and state that the canceling IXC will pay the PIC change charge as provided herein. The IXC must provide written notification to the Company that this activity has taken place.

Following the IXC's discontinuance of service, the Company will bill the canceling IXC the change charge for each end user that is currently designated to the IXC at the time of discontinuance.

**SECTION 6 - MISCELLANEOUS CHARGES AND SERVICES, (CONT'D.)**

**6.1 Toll Presubscription, (Cont'd.)**

**6.1.3 Presubscription Charge Application, (Cont'd.)**

- D.** An unauthorized PIC change is a change in the presubscribed IXC that the Customer denies authorizing. PIC disputes for Customers are resolved through an investigative process.

If an unauthorized change in toll presubscription occurs, the IXC making the unauthorized change will be assessed a charge for unauthorized change in presubscription as provided in 6.4.6 following. In addition, the IXC will be assessed the applicable charge for returning the Customer to the preferred IXC.

**6.1.4 Customer Charge Discrepancy**

- A.** When a discrepancy is determined regarding a Customer's designation of a presubscription IXC, the following applies depending upon the situation described:
- 1.** A signed letter of authorization takes precedence over any order other than subsequent, direct customer contact with the Company.
  - 2.** When two or more orders are received for a Customer line generated by telemarketing, the date field on the mechanized record used to transmit PIC change information will be used as the PIC authorization date. The order with the latest application date/time determines the Customer's choice.
  - 3.** If a Customer denies requesting a change in toll presubscription as submitted by an IXC, and the IXC is unable to produce a letter of authorization, signed by the end user, the IXC will be assessed all applicable change charges. The nonrecurring change charges are provided herein. The IXC will also be assessed the presubscription change charge as specified herein, which was previously billed to the end user.

**SECTION 6 - MISCELLANEOUS CHARGES AND SERVICES, (CONT'D.)**

**6.1 Toll Presubscription, (Cont'd.)**

**6.1.4 Customer Charge Discrepancy, (Cont'd.)**

**B. Verification of Orders for Telemarketing**

Neither the IXC or the Company shall submit a PIC change order generated by outbound telemarketing unless and until the order has first been confirmed in accordance with the F.C.C.'s current anti-slamming practices and procedures.

**6.1.5 PIC Switchback Option-Business**

PIC Switchback is an option under which no investigation activities are performed by the Company when a Customer denies requesting a change in primary toll carrier submitted by the IXCs. The IXC participating in PIC Switchback will be billed the PIC Switchback Charge, and the presubscription change charge, as specified herein, to switch the Customer to the Customer's previous carrier.

When the Company is contacted by a Customer who denies requesting a change in primary toll carrier, the Customer will be credited the charge assessed for the disputed change in carrier and will be switched back to the previous IXC at no charge. If this service is made available by the Company, IXCs may subscribe to or cancel PIC Switchback Service on 30 days notice to the Company by submitting a written request. A letter of authorization from the IXC will not be requested or accepted at a later date in the event of dispute of the charges assessed under the PIC Switchback option.

This option in no way relieves an IXC of the F.C.C. requirements for verifying all PIC orders obtained by outbound telemarketing prior to submitting those orders, or instituting steps to obtain verification of orders submitted to the Company.

In addition, the Customer has the option of initiating a complaint to the F.C.C. or the Pennsylvania Public Utility Commission's Bureau of Consumer Services concerning unauthorized changes in toll presubscription.

**SECTION 6 - MISCELLANEOUS CHARGES AND SERVICES, (CONT'D.)**

**6.3 Caller ID Blocking**

**6.3.1 General**

A calling party may block the passage of his/her telephone number, associated main listed name and voiceback of calling identification information to users or subscribers to Optional Central Office Services which utilize Signaling System 7 (SS7) technology. Blocking will also prevent call completion through the use of Return Call (\*69) Service. Customers have two blocking options as follows:

Per-Call Blocking - To activate per-call blocking, a customer dials a special code prior to placing a call. Blocking will be activated for that outgoing call only. There is no charge for using per-call blocking, and it is provided on an unlimited basis. Per-call blocking is available to all customers in the Company's serving territory, or

Per-Line Blocking - Per-Line Blocking must be added to a customer's line by contacting the Telephone Company's business office and having a service order issued. All calls are automatically blocked when a customer subscribes to Per-Line Blocking unless the blocking feature is deactivated. If a customer subscribes to Per-Line Blocking, he/she can deactivate blocking by dialing a special code prior to placing a call. Blocking will be deactivated for that outgoing call only. As facilities permit, a Per-Line Blocking customer will be provided with a separate code to deactivate blocking, which is different from the per call blocking code. Where this separate code is not available, the code for per-call blocking and the code to deactivate Per-Line Blocking will be the same. Per-Line Blocking is available to all customers in the Company's serving territory. Per-Line Blocking is provided without charge, except as discussed below.

Per-Line Blocking will be available to all customers, free of charge, in the Company's serving area and can only be added or removed from a customer's line by placing a service order with the Company. Initial requests for Per-Line Blocking will be provided at no charge. Subsequent requests for Per-Line Blocking for the same customer and telephone number at the same address may be charged the applicable non-recurring charge(s). This non-recurring charge will be waived for customers of the Company who are victims of domestic violence, the staffs of domestic violence programs and agencies, and emergency services personnel, while performing their jobs.

**SECTION 6 - MISCELLANEOUS CHARGES AND SERVICES, (CONT'D.)**

**6.3 Caller ID Blocking, (Cont'd.)**

**6.3.1 General, (Cont'd.)**

Customers who use either per-call blocking or line blocking may be unable to complete calls to Caller ID subscribers who have activated the Anonymous Call Rejection feature (ACR) of Caller ID services. If a customer using blocking calls a Caller ID subscriber who has activated Anonymous Call Rejection, he/she will hear an announcement that the Caller ID subscriber is not accepting blocked calls. There are several ways to complete a call to a Caller ID subscriber who has activated Anonymous Call Rejection: (1) place the call through an operator; (2) place the call on the Company's network using a Company's telephone calling card; or (3) place the call without blocking. Options (1) and (2) involve charges in addition to the cost of the call. However, the live operator surcharge will be waived for the Company's customers who are victims of domestic violence, the staffs of domestic violence program agencies and emergency service personnel, while in the performance of their jobs. If the operator surcharge cannot be waived when the call is being placed, the Company will, upon notification, credit the live operator surcharge to the aforementioned party's telephone bill. Furthermore, should alternative methods become available in the future which permit the aforementioned to access the ACR party without revealing the caller's telephone number, the Company will waive any additional charges associated with such alternative methods. Blocked calls routed to the Anonymous Call Rejection (ACR) announcement will not be rated as completed calls.

Caller ID blocking will not prevent the delivery of telephone numbers to 911 emergency service providers. Caller ID blocking currently will not work for callers who place calls to 8xx, 900, and/or other information and message services carrying a specific charge billed to a caller by a local telephone company.
